- Brushed Nickel

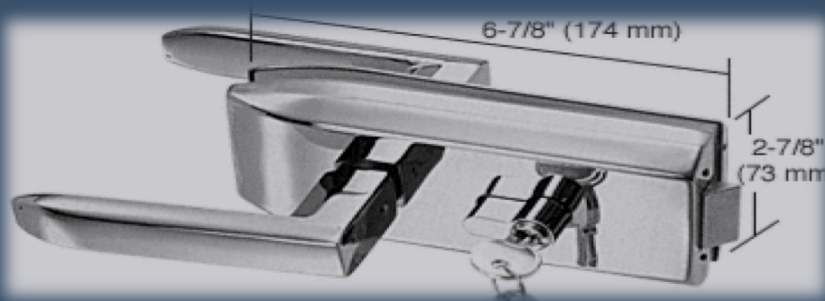

FRAMELESS FLYING DOOR LOCK

Glass Mounted Latch With Lock And
Thumb-Turn.

Brushed Stainless

OPENINGS

Main Door can be at either side or both sides.
Swing panels open inward or outward.

HOW IT WORKS

1. The first panel is fixed and can be at either side of the opening or both.
2. The second and subsequent panels slide up to the first panel and click into place.
3. Each panel then swings open and stacks parallel to the previous panel, providing you with the full use of the opening.

Operating Door
Anywhere In
Your Frameless System!

FRAMELESS FOLDING DOORS

Premier Frameless Folding Doors innovative technology provides optimum water resistance and helps keep wind, noise, dirt and the elements out without sacrificing the view.

Most Weather Tight!

- Exclusive Side-lock System™ compresses panels together.
- The panels glide on "Self Lubricating Teflon" for Maximum Seal.
- UV rated, Translucent Polycarbonate Weather Seals on each panel for added water tightness.
- 3/8" clear tempered, edged and polished glass comes standard. (Other glass options available)
- Air Infiltration – 0.16 cfm/ft2.
- Water Penetration – 0.00 psf (limited water rating when tested to ASTM E 331).

"2014 CA Title 24 compliant"

Ultra-Slim Framed Folding Doors

Premier Dual Glazed Framed Folding Doors offer the most innovative fully retractable slide and pivot doors. Premier Ultra-Slim, sleek frame design, with no visible hardware, helps you expand your space and invite the outside in with minimum obstruction.

Highest Glass To Frame Ratio!

- Less than 2 1/2" Sight Line.
- Exclusive Side-lock System™ compresses panels together.
- Panels glide on self-lubricating Teflon for a perfect seal.
- Thermally Broken Aluminum.
- 1" overall, Tempered, Low E, Dual Glazed Glass. (Other glass options available.)
- Air Infiltration – 0.12 cfm/ft2.
- Water Penetration – 0.00 psf (limited water rating when tested to ASTM E 331).
- Structural Integrity DP 50 (tested up to 173 MPH).
